

### 1) How to assembly/ disassembly the SMP powerbank with lithium battery

Totally there are 8 parts (9 with screws not on picture)

To assemble our powerbank follow below pictures and text

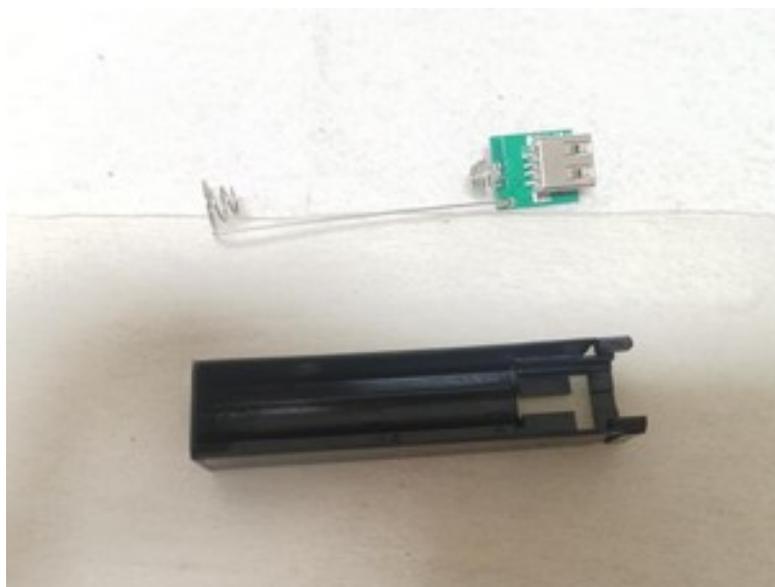

To disassembly follow the steps in reverse

The following is the detail steps how to assembly/ disassembly our powerbank with battery:

#### Step 1

Put the green color connector into the black box.

Step 2

Put the blue color lithium battery into the black box.

Step 3

This is the picture of the blue lithium battery into the black box.

Step 4

Put the black box with blue lithium battery into the small square silver color box.

Step 5

Push the black box lightly into the silver box completely.

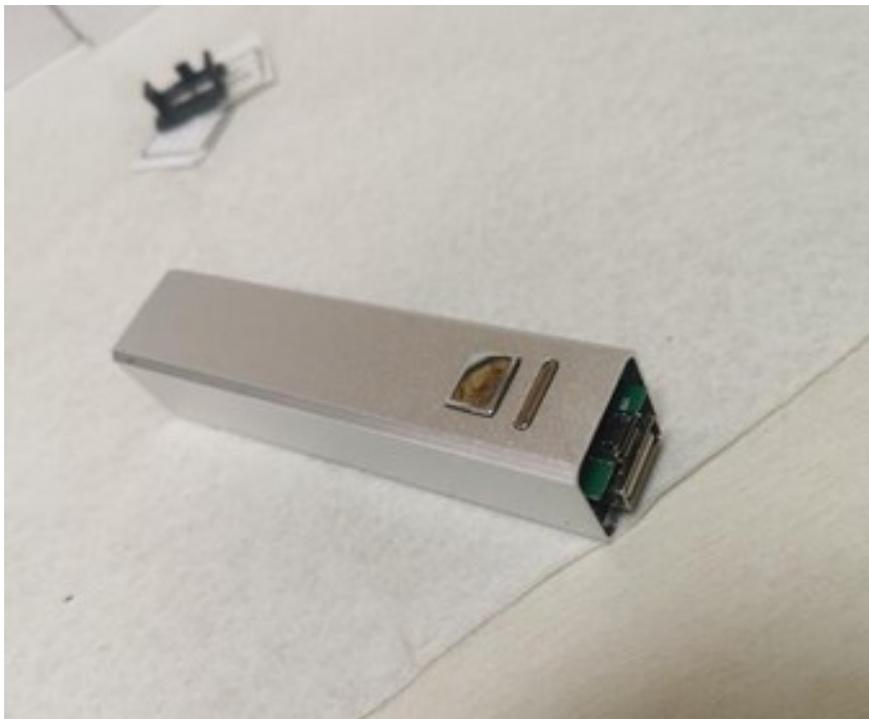

Step 6

This picture shows the black box into the silver box already.

Step 7

This is the front side of the powerbank after the lithium battery inside the silver box.

Step 8

Install the black plastic color cover on the front side of the silver box.

Step 9

Here the black plastic cover already be installed at the front side of the powerbank.  
You can screw it tight now (see the 4 screw holes)

Step 10

Put the 2 small stickers at both the front side and end side of the powerbank.

Step 11

The small sticker at the backside of the powerbank.

Picture 12

The small sticker at the front side of the powerbank then you are all done!
